

Northeast Region Regional Plan 2021-2024

Vision, Values, Aspirations

Regional Vision, Values, and Aspirations

- Increased collaboration between the workforce, education, and economic development entities serving the region.
- Efficiency and effectiveness within the system – using braided funding so we can maximize funding from all partner organizations.
- Improved access to services and jobs – especially in a rural area – making it easier to access services would make it easier for job seekers to enter the workforce.
- A thriving workforce leads to thriving communities.
- Putting people into jobs and meeting the needs of businesses through a skilled workforce today and in the future.
- Providing stability to vulnerable populations through partner collaboration and wrap-around services.
- Create better opportunities for youth and graduates through improved connections to the workforce, additional training opportunities, and resources in the community.
- Bringing all partners to the table to identify and combine our resources across our region to unify and better serve our communities.
